

Health Libraries Australia Professional Development Day at DREAMING08

Dreaming 2020 – strategic visions for health librarianship

Tuesday 2nd September 2008

8.45am to 5.00pm

Centre for Remote Health, Alice Springs Hospital Campus

Cnr Simpson & Skinner Streets, Alice Springs

The day will focus on the future and strategic issues health librarians need to address and plan for.

In the morning, plenary speakers will provide the big picture context, to provoke us by asking the hard questions in areas such as:

Our health care context:

- what library services would be best for patient care, and for population health?

Our stakeholders:

- who are the players? strategic partnerships and collaborations, and how do we get to the negotiating table?

Our people, resources, collections and buildings:

- workforce planning, education and CPD - where are the leaders?
- knowledge resources and clinical decision-support tools - what are the gradations?
- national site licencing, publishing and open access - will there be books and journals as we know them?
- what will our buildings look like and how will we function 'beyond the walls'?

Our ICT environment:

- beyond Web2.0 and Library 2.0, a new space

Afternoon concurrent workshops will cover a range of professional development topics.

The closing session will review our strategic direction and the priority critical issues for HLA.

Our sponsors are: M&L Medical Books, MIMS, HCN, Ovid, Proquest and Ramsay Books.

There will be opportunities to network with representatives on the day.

DRAFT Program

| | Topic | Presenter |
|-------------|--|---|
| 8.45-9.00 | Welcome | Convenors Ann Ritchie and Cheryl Hamill |
| | Opening plenary: <i>Our health care context:</i> | |
