

## INSTRUCTIONS ON HOW TO LIMIT ONLINE AUDIENCE TO AUSTRALIA-ONLY

### Facebook

Facebook doesn't allow you to geoblock videos. However, you can restrict who can see your page through the following steps:

1. From your News Feed, click  **Pages** in the left menu.
2. Go to your Page and click  **Page Settings** in the bottom left.
3. From **General**, click **Country Restrictions**.
4. Add one or more countries and choose to hide or show your Page to viewers in those countries.
5. Click **Save Changes**.

If you do not want to restrict access to your Library Page, you may want to consider creating a new page just for your Storytime videos.

### YouTube

YouTube does not allow creators to geo-fence video content where the creator does not have exclusive rights over the content, so this option will not be available.

If you want to continue to put your videos on YouTube or Vimeo, whilst technically not geo-blocking/geo-fencing, you can make your videos 'unlisted' (YouTube) or available to 'Only people with the private link' (Vimeo), which means that the only people who can view them are those who you share the video URL with.

To make your video unlisted, you need to change your video privacy settings:

1. Sign in to [YouTube Studio](#).
2. From the left menu, select **Content**.
3. Hover over the video you'd like to update, and click **Details**.
4. Click the down arrow under "Visibility" and choose **Unlisted**.
5. **Save**.

Here is a handy video that explains this process: <https://youtu.be/zDHStdBNbXM>.

### Vimeo

Note that this function is only available to those with a Vimeo plus account or have a higher-tier paid subscriptions (such as Pro, Business or Premium).

1. Log in to Vimeo, and click **Settings** under your video on the video page.
2. Click the **Privacy** tab.
3. You can select privacy option to determine who can see your video. Click **Only people with the private link**.
4. You may also want to consider your privacy options for video embedding, and limit to **Specific domains** (ie your library's website).

Here is a handy video that explains this process: <https://vimeo.com/359315033>
