BACKGROUND
In 2013, we set out to investigate the big questions about our future.

- How will libraries remain relevant for users?
- What changes will institutions and individuals in the sector experience?
- Will ‘library and information professional’ continue to be a necessary and desirable occupation?

We received challenging, insightful, inspiring responses to our request for feedback at events held all around Australia. As a result, we have been able to identify themes and develop actions that will support positive outcomes. The findings from the project have been produced as seven reports, available as pdf downloads from the ALIA website www.alia.org.au. This is a taster for collecting institutions.

COLLECTING INSTITUTIONS
There were five themes that emerged, specific to collecting institutions — our National, State and Territory libraries.

1. National treasures direct to your device
   Significant further investment will be needed to digitise these rich collections.

2. Linked data enriches the experience
   Galleries, libraries, museums and archives will collaborate to provide a seamless user experience.

3. The need for new legislation
   Legal deposit and copyright reform will be essential for these libraries.

4. Managing volume
   These institutions will need investment to keep pace with exponential growth in print and digital content.

5. Cultural participation
   Participation brings exciting opportunities to open up collections for future generations.
GENERIC THEMES

Ten themes covered all library and information services, including school, public, university, TAFE and special libraries, and collecting institutions.

1. Libraries and information management
   The same skills, differently interpreted.

2. Fair
   People’s love of libraries is underpinned by our contribution to a fair and just society.

3. Equality of opportunity
   We help to overcome the gap between advantage and disadvantage.

4. Funding
   Library users and funders have a different perception of the value of our services.

5. The library experience
   Others provide information, but no one else provides the library experience.

6. Analogue and digital
   We will need to look good and work well both online and in real life.

7. More space not less
   More space for people, less space for books in our future libraries.

8. Stretching collection budgets
   More content, in multiple formats — we will need to be smart with our money.

9. Community created content
   Libraries will help connect readers with all kinds of new content from surprising creators.

10. Unimaginable technologies
    Technology will continue to have a massive impact on how we work and the services we deliver.

LIBRARY AND INFORMATION PROFESSIONALS

A further ten themes looked at the professionals who work in library and information services.

1. Balancing the workforce
   New recruits will help increase age diversity.

2. Higher paid jobs
   Salaries will better reflect the importance of our role.

3. Aiming for the top
   We will need to sharpen our business skills, demonstrate flexibility and help lead change.

4. What we call ourselves
   Librarians and information professionals will co-exist.

5. Guardians of privacy
   We see an expanded role as guardians of our users’ personal privacy.

6. Technology for all
   Every LIS professional will need to be proficient in IT.

7. Beyond the library
   We will find new employment opportunities outside traditional library settings.

8. Ongoing learning
   Professional development will be a necessity for anyone on a career trajectory.

9. Future leaders
   Succession planning and support for emerging leaders will be essential.

10. Visibility
    Remaining visible in an increasingly digital environment will be one of the challenges.
